

life, work and Career

A Family Constellations workshop Facilitated by Yishai Gaster

27/28 February 2010, 26/27 June 2010

Our personal life, our career and our work are all meant to bring fulfillment and self respect.

However, at times we experience disillusion, difficult inter-personal dynamics, recurring problems in making the right decisions, and occasionally physical illnesses.

Family Constellations is a powerful process That helps to untangle difficulties that surround our life as a whole and our working life.

Working in this way can bring us in touch with our potential, it can open new resources that were not available before, and help in clarifying and reaching our goals.

In this workshop you can work on personal issues and work and career issues.
